

2026 Organic Index

NEW Unity
Early red beefsteak from Johnny's Breeding Program with excellent performance for field and tunnel production.

For over 50 years, Johnny's research, trialing, and breeding programs have brought you a diverse selection of varieties and products for certified organic production. We are pleased to introduce over 20 new organic products this year to meet your growing needs.

We trial all of our organic varieties to perform under the rigors of organic growing conditions. Temperature variations, weed competition, pests, and plant diseases can all threaten the vitality of your crops. The seeds you buy from Johnny's give you the best possible odds of overcoming those challenges. We guarantee it.

Visit Johnnyseeds.com/organic-growing to access more resources:

- Our Safe Seed Pledge
- Johnny's Organic Certificate
- Johnny's Organic Product Verification Listing
- OMRI and WSDA Certificates, Labels, and Technical Growing Information

Please contact us for additional supporting documentation for your organic certification needs.

Organic Product Designation

Johnny's plants and seeds designated with an **OG** symbol in our catalog and on our website are certified organic and are grown and handled in strict compliance with the USDA National Organic Program (NOP). Johnny's is an organic grower and handler, certified by USDA-accredited Maine Organic Farmers and Gardeners Association (MOFGA) Certification Services.

Supplies such as fertilizers and pest and disease controls that are marked with the **OG** symbol are compliant with the National Organic Program (NOP). As always, consult with your certifying agency before using inputs in your certified organic production system.
