

Long-Handled Seeder Comparison Chart

Part #	Product	Recommended Use	In-Row spacing	# of Rows	Row Spacing	Number of Hole Sizes Available	Assembled Weight	Country of Origin	Features / Notes
9170	EarthWay® Vegetable Seeder	A wide variety of small and large seeds. Best for use with larger seeds like corn, peas, and beans.	1–12", depending upon plate used.	1	n/a	11 seed plate sizes available, plus a blank plate for creating custom sizing	7½ lbs.	U.S.A.	Push-type seeder. A lightweight and affordable entry-level seeder. Most effective for larger seeds. May drop seeds in small clusters so thinning may be required. In-row spacing is limited, which may also result in a need to thin seedlings. You can widen spacing by filling some holes with wax. Single-row seeders often require less bed preparation than multi-row models and can handle some uneven soils.
9284	One-Row Pinpoint Seeder	For greenhouse planting of small to medium-size seed.	1", 1¼", or 2¼", depending upon hole size used.	1	n/a	6	2.5 lbs	Germany (body), Maine-made handle	May be pushed or pulled. Maneuver with ease in enclosed spaces. Accurate, versatile, and easy to fill and empty. Adjustable brush precisely meters seed. Compatible with a wide variety of small seeds, including arugula, basil, brassicas, carrots, claytonia, endive, lettuce (both raw and pelleted), mache, minutina, onion, parsley, radicchio, radish, spinach, and more. NOTE: Performs best on finely-tilled, well-prepared soil surfaces, especially after using a seedbed roller. Choice of six seed-hole sizes on two included shafts. Ash handle included.
9285	Four-Row Pinpoint Seeder	Densely planted, small-seeded crops such as salad mix, baby greens, carrots, or radish.	1" or 1¼", depending upon hole size used.	Up to 4	Min. 2¼", Max. 6¾"	4, plus an additional 4 with Extended Range Shaft	4.1 lbs.	Germany (body), Maine-made handle	Designed to be pulled. Good singulation. Requires a finely prepared seedbed. Firming the seedbed prior to seeding is helpful for good germination. Few moving parts to break. Good for tight spaces. Part #9861 Extended Range Shaft offers additional hole sizes for a wider range of seed hole sizes.
9461	Glaser Seeder	Densely planted, small-seeded crops. Best used with round-seeded varieties such as brassica crops.	1"	1	n/a	3	3.8 lbs.	Switzerland (body), Maine-made handle	Designed to be pulled. Good singulation of small, round seed. Single-row seeders often require less bed preparation than multi-row models and can handle some uneven soils.
9156	Six-Row Seeder	Densely planted, small-seeded crops such as salad mix, baby greens, carrots, or radish.	1", 2½", or 4" depending upon drive belt ratio.	Up to 6	Min. 2¼", Max. 11¼"	4, plus an additional 4 with Extended Range Shaft	13.1 lbs.	Maine, U.S.A.	Push-type seeder. Good singulation. Best used on a flat, well-prepared seedbed with few rocks and debris. Not for use in wet or heavy-clay soils, which may clog rollers. Part #9454 Extended Range Shaft offers additional hole sizes for a wider range of seed hole sizes.
7319	Jang JP-1 Seeder	Can be used to sow most uniform seeds of a small and medium size, and some larger seed, with the appropriate roller.	½–28" depending upon roller size and sprocket combination.	1	n/a	Wide range of roller sizes available, plus blank for creating custom sizing	25 lbs.	Korea	Push-type seeder. Excellent singulation of small and medium seed. Although we offer many recommendations, users must take the time to find what rollers work for the seed varieties used in their system. Single-row seeders often require less bed preparation than multi-row models and can handle some uneven soils. Additional shoe and attachment options are available.
7606	Jang JP-2 Two-Row Push Seeder	Can be used to sow most uniform seeds of a small and medium size, and some larger seed, with the appropriate roller.	½–28" depending upon roller size and sprocket combination.	Up to 5; includes 2 seed hoppers	3–12"	Wide range of roller sizes available, plus blank for creating custom sizing	31.1 lbs	Korea	Push-type seeder. Excellent singulation of small and medium seed. Although we offer many recommendations, users must take the time to find what rollers work for the seed varieties used in their system. Requires moderate bed preparation. Use add-on hopper assemblies to expand to a 3, 4, or 5 row seeder. Additional shoe options are available.
7607	Jang JP-3 Three-Row Push Seeder	Can be used to sow most uniform seeds of a small and medium size, and some larger seed, with the appropriate roller.	½–28" depending upon roller size and sprocket combination.	Up to 5; includes 3 seed hoppers	3–6"	Wide range of roller sizes available, plus blank for creating custom sizing	35 lbs.	Korea	Excellent singulation of small and medium seed. Although we offer many recommendations, users must take the time to find what rollers work for the seed varieties used in their system. Requires moderate bed preparation. Use add-on hopper assemblies to expand to a 4 or 5 row seeder. Additional shoe options are available.
7608	Jang JP-6 Six-Row Push Seeder	Can be used to sow most uniform seeds of a small and medium size, and some larger seed, with the appropriate roller.	½–28" depending upon roller size and sprocket combination.	Up to 8; includes 6 seed hoppers	3–4½"	Wide range of roller sizes available, plus blank for creating custom sizing	56 lbs.	Korea	Push-type seeder. Excellent singulation of small and medium seed. Although we offer many recommendations, users must take the time to find what rollers work for the seed varieties used in their system. Requires moderate bed preparation. Use add-on hopper assemblies to expand to a 7 or 8 row seeder. Additional shoe options are available.
7609	Jang JP-6W Six-Row Wide Push Seeder	Can be used to sow most uniform seeds of a small and medium size, and some larger seed, with the appropriate roller.	½–28" depending upon roller size and sprocket combination.	Up to 12; includes 6 seed hoppers	3–7"	Wide range of roller sizes available, plus blank for creating custom sizing	62.2 lbs.	Korea	Push-type seeder. Excellent singulation of small and medium seed. Although we offer many recommendations, users must take the time to find what rollers work for the seed varieties used in their system. Requires moderate bed preparation. Use add-on hopper assemblies to expand to a 7, 8, 9, 10, 11, or 12 row seeder. Additional shoe options are available.
7008	Jang TD-1 Precision Seeder	Large seeds such as beans, corn, peas, including large, flat seeds like pumpkins.	2–42" depending upon plate size and sprocket combination.	1	n/a	3 seed plate sizes available, plus blank plates for creating custom sizing	22½ lbs.	Korea	Push-type seeder. Excellent singulation of larger seed. Single-row seeders often require less bed preparation than multi-row models and can handle some uneven soils.
