

LEEK VARIETIES PLANTING/HARVEST PROGRAM

You can plant several varieties of leeks with different maturity dates at the same time and harvest them in succession. Each variety will mature in its appropriate season from a single spring sowing. Faster growing leeks are less cold tolerant, and are harvested first in summer to early fall. Slower growing leeks are more cold tolerant, and will be ready for harvest in fall through early winter (and even longer in milder climates).

Variety	Part #	Harvest Window	Hybrid or OP?
A King Richard	416G OG or 2403	Summer	OP
B Rally	3411G OG	Summer	Hybrid
C NEW Biker	4918	Late Summer/Fall	Hybrid
Comanche	4053G OG or 4053	Late Summer/Fall	Hybrid
Jumper	4126	Late Summer/Fall	Hybrid
D Tadorna	2092G OG	Late Summer/Fall	OP
Surfer	4150G OG	Fall	Hybrid
E NEW Oslo	4939G OG	Late Fall/Winter	Hybrid
F Bandit	195G OG	Winter	OP
