# Salanova®

## The Ultimate Efficiency Lettuce

Compared to baby leaf, expect a higher quality salad mix with a lower production cost.

### By transplanting and growing full-size heads instead of direct seeding, you can expect:

- **Improved cultivation efficiency.** Get a jump on weeds or plant into weed barrier. Fewer weeds come harvest time means faster picking, washing, and packing.
- **Increased yield per area,** especially when harvesting multiple cuts. Direct seeding inevitably leads to some wasted space due to skips in germination and loss at the vulnerable seedling phase. In addition to the benefits of a full stand, Salanova plants can really bulk up, given proper growing methods. And, multiple cuts are feasible for all Salanova varieties.
- **Higher stress tolerance.** A mature plant can better handle temperature, drought, and pest pressure. Additionally, Salanova varieties carry a strong, ever-evolving disease package.
- **Superior field holding.** Salanova offers an extended harvest window; it is slow to bolt and turn bitter, with greater potential for multiple harvests of higher quality.

### By harvesting fully mature leaves instead of baby leaf, you can expect:

- Thicker and stronger leaves, which translates to **greater loft, higher weight, and better handling** from field to delivery.
- More durable cells and higher dry matter, which **dramatically increase shelf-life.** Whole heads can be stored in the cooler for up to 2 weeks.
- Fully developed colors, flavors, and textures, all of which **enhance appearance and eating quality.**

**Red Incised**

**Red Sweet Crisp**

**Red Tango**

## SALANOVA® The Ultimate Efficiency Lettuce

The industry standard in salad mix for its high leaf count of baby-size leaves in interesting shapes and colors. All varieties tend to hold their great flavor without going bitter better than typical head lettuce, which allows for a longer harvest window. All Salanova seed is MT0-30 (tested for the presence of Lettuce Mosaic Virus) and seeds are pelleted with NOP-compliant material, for sowing ease. Salanova varieties are also suitable for hydroponic production. Plant Variety Protected.

### **Salanova® Incised** 53 days.

**EXCLUSIVE!** Open heads with narrow stems on deeply incised leaves. High-loft, uniformly sized leaves with curled structure and Lollo-like frill. Crispy yet flexible leaf and ribs. Vigorous habit is great for multiple cuts and both hand and mechanical harvesting. Plant Variety Protected. MT0-30. 🌱

**Green 3052JP HR: DM (EU 16-30, 32, 33; US 5-9), Nr. IR: LMV.**

**Red 3053JP HR: DM (EU 16-38, 40, 41; US 5-10), Nr. IR: LMV.**

### **Salanova® Sweet Crisp**

**EXCLUSIVE!** Open heads with narrow stems on deeply incised leaves. Fancy, jagged margin all the way down the ribs creates an attractive leaflet on the plate. Heavy texture and excellent yield potential. Sweet, romaine-like flavor with crisp, juicy ribs. Vigorous habit is great for multiple cuts and both hand and mechanical harvesting. Plant Variety Protected. MT0-30. 🌱

**Green 3054JP 50 days. HR: DM (EU 16-37, 39-41; US 5-10), Nr. IR: LMV.**

**Red 3055JP 55 days. HR: DM (EU 16-37, 39-41; US 5-10), Nr.**

### **NEW Salanova® Green Upright Oak** 6085JP 55 days.

**HR: DM (EU 29-37, 39-41), Nr.**

**EXCLUSIVE!** Open heads with narrow stems on deeply lobed leaves. High vigor and strong yield potential along with reliable bolt and tipburn resistance make this a strong performer across all seasons. A taller variety with a sturdier leaf and looser head than the standard Salanova Green Oakleaf; it is well suited to mechanical harvest. MT0-30. 🌱

### **Salanova® Red Tango** 4764JP 55 days.

**HR: DM (EU 16-37, 39-41; US 5-10), Nr, Pb.**

**EXCLUSIVE!** Open heads with narrow stems on deeply lobed leaves. High-loft tango-type leaves. Soft texture with crisp midribs. Excellent performance in both summer and winter. Strong yields in a slower to mature plant. Great for multiple cuts and both hand and mechanical harvest. Slowest bolting of all our Salanova and one-cut lettuces. Plant Variety Protected. MT0-30. 🌱

### **Salanova® Oakleaf**

**EXCLUSIVE!** Compact, densely packed heads with a tight core. Wavy, lobed leaves and an interwoven arrangement create stunning heads, even at an early stage. Excellent flavor and texture through maturity. Exceptional marketed as true mini heads, and withstands multiple cuts if cut for a mix; we recommend one circular cut around the core to separate the leaves. Plant Variety Protected. MT0-30. 🌱

**Green 3058JP 55 days. HR: DM (EU 16-37, 39-41; US 5-10), Nr.**

**Red 3059JP 57 days. HR: DM (EU 16-32, 34, 36, 39, 40; US 5-9), Nr.**

### **Salanova® Foundation Collection 3072JP** 53 days. **HR: DM, Nr.**

**EXCLUSIVE! Use as a salad mix base for structure, loft, and yield.** Can be used as a standalone mix or combined with the Salanova Premier Collection. Includes equal amounts of each of the Sweet Crisp and Incised types. 🌱

**Salanova® Foundation Collection**

## Salanova Benefits

Johnny's Product Manager, Brenna Chase, explains the advantages of growing Salanova lettuce.

**Green Oakleaf**

**Green Butter**

**Green Batavia**

**Red Oakleaf**

**Red Butter**

**Red Gem**

**Salanova® Butter** 55 days. **HR: DM (EU 16-37, 39-41; US 5-10), Nr.**  
**EXCLUSIVE!** Compact heads with a tight core and impressive number of salad-sized uniform leaves. Attractive rosette-like habit with rounded, wrinkled leaves for a truly striking presentation. Develops characteristic butteriness at full maturity. Exceptional marketed as true mini heads, and withstands multiple cuts if cut for a mix; we recommend one circular cut around the core to separate the leaves. Plant Variety Protected. MT0-30. 🌱 🌿  
**Green 3056JP** **Red 3057JP**

**Salanova® Green Batavia** 4185JP 55 days.  
**HR: DM (EU 16-32, 34, 36, 39, 40; US 5-9), Nr. IR: LMV.**  
**EXCLUSIVE!** Compact, heavy heads with a tight core and numerous salad-sized uniform leaves. Scalloped semi-savoy leaves add crunch and juicy texture. Exceptional bolt and tipburn tolerance. Great when marketed as true mini heads, and withstands multiple cuts if cut for a mix; we recommend one circular cut around the core to separate the leaves. Plant Variety Protected. MT0-30. 🌱 🌿

**Salanova® Red Gem** 4823JP 58 days.  
**HR: DM (EU 16-37, 39-41; US 5-10), Nr.**  
**EXCLUSIVE!** Attractive deep red leaves in an exceptional mini head. Excellent performance in hydroponic systems. Compared to Salanova Red Butter (#3057JP and #4449JP), Salanova Red Gem plants are more upright with sturdier leaves that are easier to handle and have a longer shelf life. Heads stay open for slightly longer than other red Salanova options, leading to more red pigmentation nearer the core. 🌱 🌿

**Salanova® Premier Collection** 3073JP 55 days. **HR: DM, Nr.**  
**EXCLUSIVE!** Refine your salad mix with color, flavor, and elegance. Excellent as a standalone mix, but best when combined with our Salanova Foundation Collection. Includes equal amounts of the Butter and Oakleaf types in individual packages. 🌱 🌿

**Salanova® Premier Collection**

**Lettuce Resistance Codes**

**HR** = High Resistance **IR** = Intermediate Resistance

<b>DM</b>	Downy Mildew*
<b>LMV</b>	Lettuce Mosaic Virus
<b>Nr</b>	Lettuce Leaf Aphid
<b>Pb</b>	Lettuce Root Aphid
<b>Rs</b>	Corky Root
<b>TBSV</b>	Tomato Bushy Stunt Virus (Lettuce Dieback Complex)

\*Numbers indicate known resistance to lettuce downy mildew isolates from either Europe (EU), United States (US), or both. As new races of downy mildew are identified, older races become obsolete. To be concise, Johnny's no longer includes obsolete races in the product listing.

**NEW**

**Green Upright Oak**

## Key Benefits Over Baby Leaf Lettuce:

- **Efficiency.** Lower production cost, higher yields per area, easier to cultivate.
- **High value.** Improved storage, flavor, texture, color, loft, and handling.
- **Adaptability.** More flexibility in harvest timing because of superior field holding.
- **Versatility.** More marketing options as mini heads, whole heads, cut salad mix, or premixed with other baby leaf crops.

## What Our Growers Are Saying

"Salanova® is one of our best year-round crops, capable of thriving through cold snaps and heat waves alike."

**Emma Jagoz**  
Moon Valley Farm  
Woodsboro, MD (USDA Zone 7a)
