

BABY LEAF LETTUCE VARIETIES COMPARISON CHART

Recommended Jang Seed Roller: XY-24 or XY-36

High Performance

These varieties are developed to perform well at an early stage of maturity. Vigorous, uniform seedling growth and thicker leaf textures help increase yield within a short growing period. The uniform growth also allows for consistent leaf size even at variable plant densities. In addition, we select for loftiness to prevent leaves sticking together post-harvest, as well as thinner petioles to reduce cut surface area. Most high-performing baby leaf varieties will result in loose and lightweight heads if grown as full-size lettuce. Speed of growth is within a range of 28–40 days.

| Type | Part # | Variety | Speed | Description |
|-----------------|--------------------|--------------------|--|---|
| Oakleaf | 4804 | NEW Red Tip | Medium | Upright growth habit, deep rounded lobes, and narrow petioles. Dark red. DM: EU 16–37; US 5–9. MT0-30. |
| | 3331G CG | Clearwater | Medium | Dark green leaves with heavy texture and sweet flavor. Very upright for easy harvesting. DM: EU 16–35, US 5–9; Nr, LMV. MT0-30. |
| | 3754G CG | Spritzer | Slow | Tango type with wavy, 3-D leaf structure. Slow growing but darker color. DM: EU 16–25, 27, 28, 30–32; US 5–8. MT0-30. |
| | 3754 | Spritzer | | |
| | 2803 | Sulu | Medium | Lime green leaves with heavy, 3-D texture and good flavor. Very upright habit. DM: EU 17. MT0-30. |
| Romaine | 4225 | Alboreto | Slow | Bright, dark red leaf with ruffled margin and upright growth habit. DM: EU 16–37, US 5–9; Nr. MT0-30. |
| | 4617G CG | Carlsbad | Fast | Crunchy, juicy, sweet romaine. Cupped leaf provides high loft. Upright habit; maintains quality in the field. DM EU 16–20, 22–25, 27, 28, 30, 32; US 5, 7, 9. MT0-30. |
| | 4123G CG | Pensacola | Fast | Vigorous early growth, dark green, and upright. DM: EU 16–29, 32, 34; US 5–9; Nr, TBSV, LMV. MT0-30. |
| | 4204G CG | Powerhouse | Slow | Dark red and upright with very narrow petiole. Thin leaf with crisp texture. DM: EU 16–21, 23–26, 28–33, 35; US 5–9. MT0-30. |
| | 4204 | | | |
| 4242G CG | NEW Riptide | Medium | Crunchy rib with an iceberg look. Distinctive, saw-tooth margin and sweet flavor in all growing slots. MT0-30. | |
| Summer Crisp | 3154G CG | Celinet | Medium | Narrow petiole with spikey margins and crisp texture. Great field-holding ability. DM: EU 16–35, US 5–9; Nr, TBSV, LMV. MT0-30. |
| | 3268G CG | Coastline | Slow | Wider, medium-green leaves with fancy, serrated margins and a heavy, crunchy texture. Great flavor and excellent field holding. MT0-30. |
| | 4203 | Tambay | Medium | Deeply incised, dark green, glossy leaves with long harvest window. One-cut attributes for baby leaf production. DM: EU 16–37, US 5–9; Nr. MT0-30. |

Deer Tongue

Black Seeded Simpson

Red Sails

Waldmann's Dark Green

Dark Red Lollo Rossa

Green Saladbowl

Red Saladbowl

Tango

Flashy Trout Back

Jericho

Outredgeous

Parris Island

Heritage

These varieties have stood the test of time for flavor, reliability, and wide adaptability. While they are faster growing and have thinner, more delicate leaves than our high-performance baby leaf varieties, they offer minimal disease resistance and often lack field-holding capacity. Many are dual-purpose and will mature into nice full-size heads. Speed of growth is within a range of 28–40 days.

| Type | Part # | Variety | Speed | Description |
|---------|------------------|-----------------------|-----------|--|
| Bibb | 423G OG | Deer Tongue | Fast | Unique narrow, pointed, buttery leaves with a crunchy rib and excellent flavor. MT0-30. |
| Leaf | 425N | Black Seeded Simpson | Medium | Bright blonde, curled leaves. Excellent flavor. Non-MT0. |
| | 431G OG | Red Sails | Fast | Wide, mottled red leaf with narrow petiole. AAS winner. MT0-30. |
| | 428G OG | Waldmann's Dark Green | Fast | Medium-green, curled leaf with wavy margins. MT0-30. |
| Lollo | 2326NG OG | Dark Red Lollo Rossa | Slow | Heavily frilled, dark red leaf margin with green interior. Maintains strong red color under low-light conditions. Non-MT0. |
| Oakleaf | 2235N OG | Green Saladbowl | Fast | Delicate, lobed lime-green leaves. AAS winner. Non-MT0. |
| | 2233N OG | Red Saladbowl | Fast | Delicate, lobed burgundy leaves. Non-MT0. |
| | 405N | Tango | Medium | Our selected strain of this classic salad mix ingredient. Great loft, strong regrowth. Non-MT0. |
| Romaine | 2716NG OG | Flashy Trout Back | Very Fast | Attractive speckled, smooth leaves. Seed densely for narrower petioles and leaves. Developed by Frank Morton of Wild Garden Seed. Non-MT0. |
| | 349G OG | Jericho | Very Fast | Bright green and fast growing. Seed densely for narrower petioles and leaves. MT0-30. |
| | 2208G OG | Outredgeous (MT0-30) | Very Fast | Ruffled bright red leaves with very fast early growth. Developed by Frank Morton of Wild Garden Seed. |
| | 2208N | Outredgeous (Non-MT0) | | |
| | 2234N OG | Parris Island | Very Fast | Upright, medium-green oval leaves. Good flavor and texture. Seed densely for narrower petioles and leaves. Non-MT0. |
