Rosie	3159	45	Red	Green	12"	–	8–10"

Joi Choi and Bopak (L to R)

Growing Pac Choi/Bok Choy

Brassica rapa var. chinensis

CULTURE: Sow from early spring through midsummer. In the South, pac choy is well adapted for fall plantings. Sow 15 seeds/ft., 1/4" deep in rows 4–12" apart, depending on the variety. Thin plants as recommended in our Pac Choi Comparison Chart. Harvest before flowering.

TRANSPLANTING: Start seeds in 128 or 72-cell trays, 2–4 weeks before transplanting. Plant out before plants become rootbound or stressed to prevent premature bolting.

PESTS: Flea beetles can be controlled by covering with floating row covers from day of sowing.

AVG DIRECT SEEDING RATE: For bunching: 830'/oz., 13,000'/lb. at above spacing.

SEED SPECS: SEEDS/OZ.: Avg. 10,300.

PACKET: 250 seeds, sows 16' full-size.
